- Database: PostgreSQL
- Platforms: Windows, Linux based systems

Design
- Proficient in: HTML, CSS

RELEVANT PROJECTS

Front-End Developer   2021

DanielPerezDev.com – AngularJS
- Fully designed and constructed portfolio website.
- Constructed Github widget for personal projects using the Github REST API and AngularJS.

Back-End Developer   7/2020

College Project – Geek Text API
- Primary responsibility was working with Spring Boot and Java to store and organize data to a database.
- Worked in tandem with front-end developers to demonstrate the proper usage of the API on a graphical user interface.
- Worked with a team of programmers utilizing the Agile Scrum Development cycle, not only documenting our code base but also delegating tasks through every sprint.

Front-End Web Developer   2012-2017

BMPAutoDetailing.com – Front-End Web Development
- Designed web pages to meet client's specifications using CSS frameworks like BootStrap.
- Prototyping designs with clients to achieve the best possible product

EDUCATION

Florida International University   4/2021
Miami, Florida
- Bachelor's in Computer Science
